

ø34x20 support - gap 11/12 mm, 18/20 mm rebate

Description

Right or left-handed stay arm support equipped with a pressed steel supporting pin.

Application

For tilt & turn windows weighing less than 130 kg.

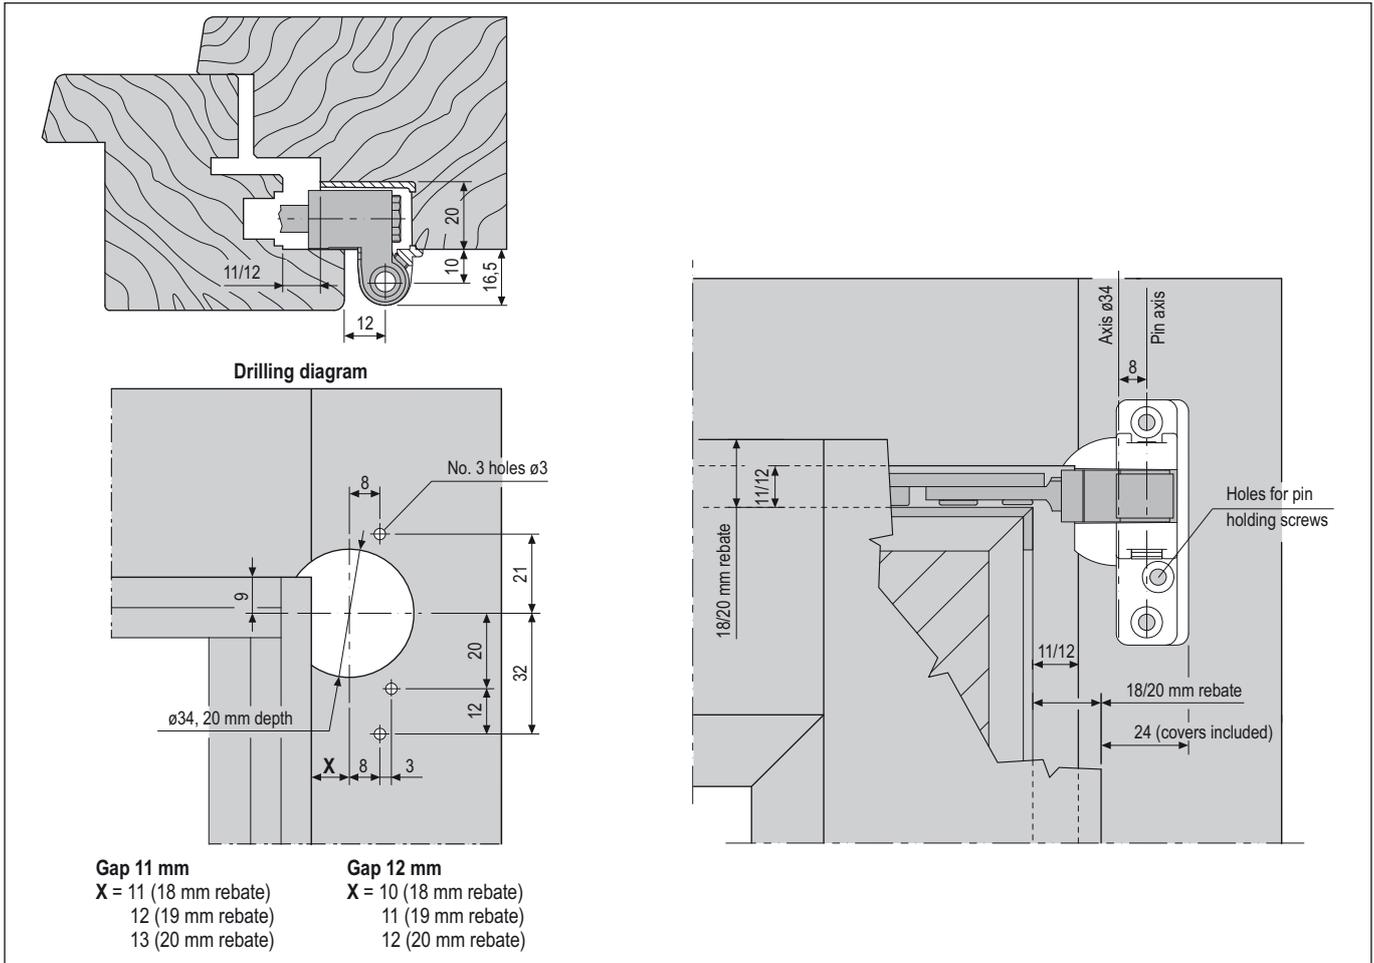

It must be used as follows:

- 1) on single or double-sash rectangular windows, in combination with stay arm art. A40111.06.XX;
- 2) on angled windows, in combination with stay arm art. A20112.06.;
- 3) on double-sash windows, as a support for the upper hinge art. A20138.06.01.

Mounting

Use 4x40 mm screws with thread suitable for the window material. The screw next to the supporting pin on the coupling side (upper or lower) has a safety function since it keeps the pin from sliding out. It must be fastened only after the support has been installed.

NB. Adjustable jig art. A20030.00.03 is available for the 34x20 mm milling as well as for the 3 mm guide holes needed for hinge alignment.
